PROJECT PROPOSAL

Course Code	CSE311L	
Course Title	Database Systems Lab	
Faculty Name	Dr. Nabil Bin Hannan [NLH]	
Lab Instructor	Md. Amanullah Shah	
Section	03	
Group / Team Number	04	
Date of Submission	10 th July 2026	
Group Members Name & ID	Efat Jahan	2131762042
	Nishat Fateha Suchona	2413099042
	Zakir Bin Lablu	1813386042
	Sheikh Mahpara Ema	2021684642

Project Proposal — Submission Form

1. Project Title & One-Line Description

Library Management System – A web-based Library Management System that allows users to borrow books while enabling the administrator to manage books, users, and borrowing transactions.

2. Problem Statement

Many small libraries still manage books and borrowing records manually, which is time-consuming and prone to mistakes. It becomes difficult to keep track of available books and borrowed books without a proper database. A database management system helps organize books, users and borrowing records in one place. This project will make library management easier, faster, and more accurate.

3. Core Features / Scope

The System will use 3 MySQL Tables:

- Manage Books- Add, edit, delete, and view books.
 - Manage Users- Add, edit, delete, and view library members.
 - Borrow Books- Users can request and borrow available books.
 - Manage Transactions- Admin can update return dates and borrowing status.
 - Search Books- Users can search books by title or author.
-

4. Team Roles

Student Name	Student ID	Role
Efat Jahan	2131762042	Develop the user registration, login, and user management module.

Nishat Fateha Suchona	2413099042	Design database (books, users, transactions).
Zakir Bin Lablu	1813386042	Develop the book management and borrowing system.
Sheikh Mahpara Ema	2021684642	Integrate the system, test all features, fix bugs, and prepare documentation.
